Mr. Lockard,

I will attach your updated information to the report and make the change in the system.

Thank you,
Linda

Subject: NRC Report 932314 Amendment

Please reference NRC Report Number 932314

On February 25, 2010 at approximately 4:21 PM, the National Response Center was notified of a release of a wastewater at Alliant Techsystems Inc, Radford Army Ammunition Plant, State Route 114, Radford Virginia. (Phone 540-639-8344) The wastewater released contained a trace amount of nitroglycerine. This release occurred as a result of an overflow from a sewer system. At the time the call was made, we were unsure of the amount of material released and if the Reportable Quantity (RQ) for nitroglycerine had been exceeded. Through the analysis of the released wastewater, it has now been estimated that less than 2 pounds of nitroglycerine was released as a result of this incident. This amount is well below the 10 pound RQ established for nitroglycerine. Therefore, I request that our report be amended to reflect this new information. Please acknowledge receipt of this message so I can follow up with my in-house report.

Thanks,

(b) (6)
